**(x) Israel 1948-72, Israel Stamp Booklets. An extraordinary and virtually unique collection, fully mounted to exhibition standards on 128 pages. This exceptional collection presents a comprehensive overview of Israeli stamp booklets issued during the first 25 years of the country's postal service, documented through original booklets, covers, proofs, varieties and related material -Israel developed a distinctive and remarkably rich field of stamp booklets; they represent the very first postal concepts and practical solutions of the State of Israel and are therefore regarded as true classics of Israeli philately-. The collection includes the only known booklet of postal stationery, a unique feature in world philately; the Freedom from Hunger sheet with tête-bêche positions, of which only a very small number were ever used in booklet form. Of outstanding importance are more than 20 panes from the first provisional Doar Ivri booklet issue, including material from the collection originally titled "First Coin (Doar Ivri) Provisional Stamps Booklets", and even of more significance and great rarity are all six proof sheets of this set. A defining feature of this collection is its treatment of the booklet, including advertising panes and covers, with elements that were almost never preserved at the time. The survival of complete booklets with all advertising areas intact is exceptionally rare, and this is one of only two comparable collections known worldwide, the other being held within the British Royal Collection. A lot of extraordinary rarity, depth, and exhibition pedigree, representing one of the most important studies ever formed of Israeli stamp booklets, and awarded at seven worldwide exhibitions. Subject to 5% tax on Hammer Price in addition to 20% VAT on Buyer's Premium.**
